

Stage Plot/Tech Rider: Lojo Russo/612-327-0001/Lojo@LojoRusso.com

Technical Rider

- DI box (1) - for guitar
- XLR (1) - for “suitcase” kick drum
- Boom-arm microphone stand
- power supply within a reasonable distance of performance area
- Monitor (when available - either side of mic stand is fine)

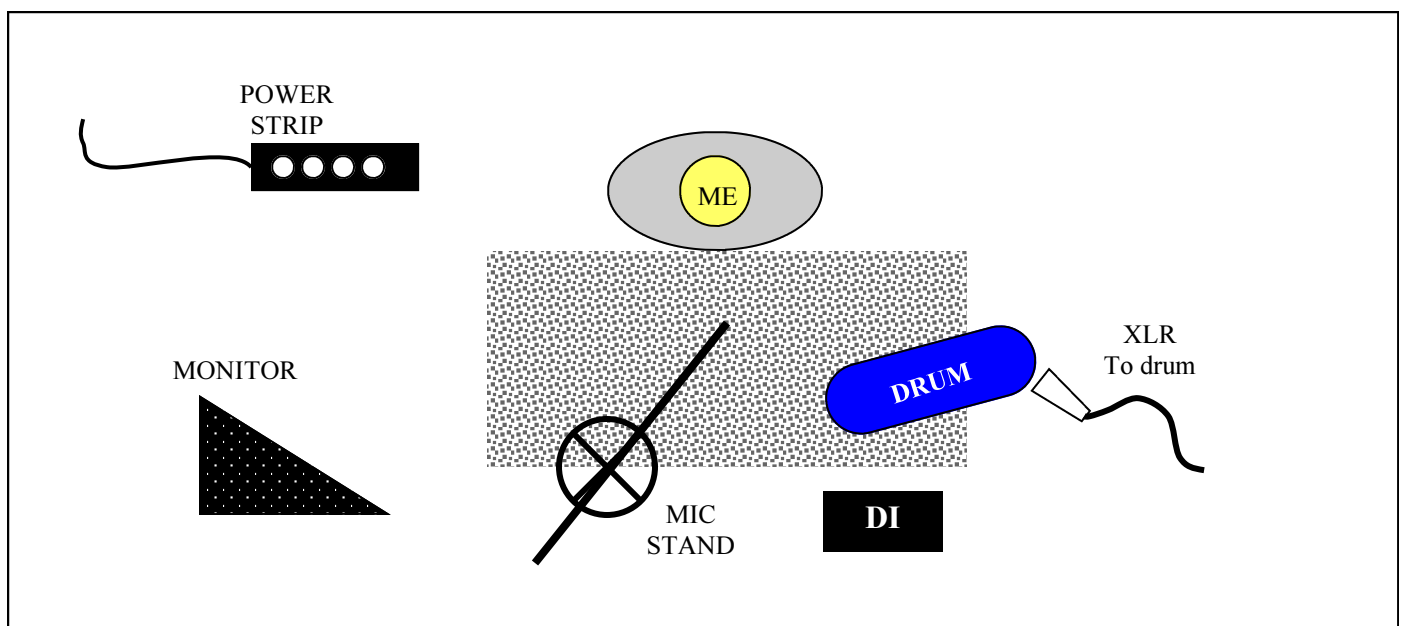

Useful info

- I play 2 acoustic/electrics. One is a cedar top that gets all my open tunings the other is a Guild that stays in standard tuning. Both go into the one DI to allow for stomp boxes.
- The 2 guitars have different tones but I use a volume pedal to keep the volume levels even and to mute the line between switching out the guitars. My playing style ranges from soft finger picking to percussive flat-picking - some comp may be necessary.
- My vocals range from soft to percussive as well (alto-mezzo soprano). I prefer to use my own vocal mic (Sennheiser E935) instead of SM58s. Please mix my vocals to be up in the mix and just a little “wet”.
- Suitcase kick drum uses a Nady DM47 mounted inside the case.

Standard Rider

- Shade/cover to be provided for outdoor shows lasting more than 60 minutes.
- 1 Bottle of water per set would be nice.

Thank you for your support! ~ *Lojo*
